**Name:** \_\_\_\_\_

**Class :** \_\_\_\_\_

### Design

Your goal in the Design criterion should be to make several possible designs ideas

- the design should includes proper labels and descriptions
- Using one product but have different layout designs

that meet the design specifications and to check these against the specification to see which design is the best. Once you have decided on the best one you should work on **justifying** your choice. You should make sure you have looked at several possibilities and evaluate them in detail against the design specification.

**Teacher's feedback:**
